

GUIDANCE NOTES

APPLICATION FOR INDIVIDUAL VEHICLE APPROVAL (IVA) - N2/N3 CATEGORY VEHICLES

Goods vehicles having a maximum mass exceeding 3500kg

The Road Vehicles (Approval) Regulations 2009

SECTION A - GENERAL

Where the application is supported by a copy of an EC Certificate of Conformity it will **not** be necessary to complete the items that have a shaded (blue) background. (Items 4g, 4h, 4i, 6c, 7a).

If this application relates to a vehicle that is required to comply with the Goods Vehicles (Plating and Testing) Regulations 1988, it will also be considered as an application under these regulations and result in the issue of a 'Plate and Plating Certificate'.

If a vehicle is approved as a 'complete' vehicle and is subsequently modified such that the approval is no longer valid, further approval (e.g. IVA) in the modified condition will be required.

1. APPLICANT CONTACT DETAILS

Please include the full name and address including postcode.

For limited companies, partnerships or sole proprietor, the registered name should be given. If a trading name is used, it should be given.

If applying as a company please supply a contact name and number.

2. APPOINTMENT AND PAYMENT DETAILS

2a. Which test station would you prefer?

Please provide a second choice of test station, as an appointment at your first choice test station may not be available.

2b. When would you like the test?

Please give your preferred test day and time. The test station will give an appointment, as near as possible to the day and time you prefer. Testing outside 'normal' hours may be available at certain test stations. These times would be before **8am** or after **5pm** Monday to Thursday, before **8am** or after **4.30pm** on Fridays or at any time at weekends or bank holidays. You would have to pay an extra fee for testing outside normal working hours. If you require this service please ask your preferred test station if it is available.

2c. Payment Method.

Please make your cheque or postal order payable to 'VOSA'. You can check the fees on our websites www.transportoffice.gov.uk or www.direct.gov.uk or via our **ENQUIRY LINE - 0300 123 9000** or by email to enquiries@vosa.gov.uk

Please do not send notes, coins or Giro transfers in the post.

If you want to pay by credit card, tick the appropriate box but do not write your card details on the application. We will contact you by phone to complete the transaction.

For pre-funded accounts the signatory on the application must be a delegate who is pre-authorised to use the account. If you wish to add a delegate e-mail the PFA team at customer.accounts@vosa.gov.uk

3. VEHICLE DETAILS

3a. Vehicle Identification Number (VIN) or chassis number

You can find the vehicle identification or chassis number on the manufacturer's plate either under the bonnet or around the door opening. Where the vehicle was previously registered in another country it can be found on a previous registration document or, if available, on the Type Approval document. If we consider the number to be unsuitable, we will refer you to your local DVLA office who will give you a new number. Please make sure you write the number in **full**.

3c. What is the category of vehicle?

The vehicle category is dependant on the "maximum mass" i.e. the Design Gross Vehicle Weight.

Category N2 - Goods vehicles with a maximum mass exceeding 3,500kg but not exceeding 12,000kg.

Category N3 - Goods vehicles with a maximum mass exceeding 12,000kg.

In general a vehicle of category N2 or N3 used for the carriage of goods will require 'Plating' under the

Goods Vehicles (Plating and Testing) Regulations 1988. For a list of those vehicles that do not require 'Plating' please refer to Schedule 2 of the "Plating and Testing" regulations.
3f. Date of manufacture. This is the date the vehicle was completed to the extent that it can be inspected to the full IVA inspection criteria. You can get the date your vehicle was made from the manufacturer's information plate, the manufacturer or, if available, the Type Approval document.
3i. "Automatic" includes any transmission where a "drive mode" can be selected that automatically provides changes in gear selection as vehicle speed increases/decreases. Gearboxes having an electronic control that provides individual gear selection only will be considered to be a "manual" transmission.
3m. Where is the engine number located? Please indicate where the engine number is located, i.e. L/H side of block (when viewed from driver's seat).
3n. Number and arrangement of cylinders? This information can be obtained from the manufacturer of the engine.
3o. Engine capacity. Please provide the manufacturer's quoted engine capacity in cubic centimetres cm ³ (i.e. 'cc')
3p. What is the maximum engine power? Please provide the manufacturer's quoted engine power in kilowatts (kW).

SECTION B - APPROVAL

4. VEHICLE COMPLIANCE

In support of this application, it is necessary to provide evidence of compliance with the "Relevant Directives".

"Relevant Directives" relating to a goods vehicle of category N2/N3 are those relating to noise, emissions, gas fuel tanks, heating system (if fitted), brakes, anti-theft if fitted, rear under run, steering effort and EMC.

Demonstrating compliance can be achieved by one or more of the following methods

- ◆ **Directive Compliance.** Showing that European Approval Standards are met, for example, by documentary evidence from the manufacturer. This may be demonstrated by a copy of a Certificate of Conformity for the vehicle, together with a manufacturer's declaration (see Annex 'A') as to which Directive items the vehicle's approval covers. Alternatively a letter from the manufacturer, listing the European Community (EC) Directives that the vehicle met at the time it was made. You must send a copy of this with the application; however, **YOU MUST SHOW US THE ORIGINAL AT THE TIME OF TEST.**
- ◆ **Comparison Test.** A comparison test at a designated Technical Service (Test Laboratory) with a known type approved vehicle.
- ◆ **Directive Test.** Physically having a test conducted at a designated Technical Service (Test Laboratory) to the appropriate Directive standard.
- ◆ **Model Report.** The use of a Model Report compiled from data obtained from a designated Technical Service (Test Laboratory).

Immobiliser/Alarm (if fitted).

You must show us evidence from the vehicle manufacturer or a designated Technical Service (Test Laboratory), or an original certificate of installation from an approved installer for an immobiliser that meets the European Directive requirements at the time of test. If the vehicle also has an alarm fitted, we will also need evidence that it meets the necessary standards. If presenting a certificate of installation it will need to be a certificate from an accredited installer either Vehicle Security Installation Board (VSIB) (phone 0870 5502006 or visit www.vsib.co.uk) or Mobile Electronic Security Federation (MESF) (**selected installers only**, please refer to website www.mesf.org.uk or phone 01376 561040).

4c. Does the vehicle have an ECWVTA or NSSTA Certificate of Conformity as an "incomplete", "complete" or "completed" vehicle?

"ECWVTA" is a European Community Whole Vehicle Type Approval and "NSSTA" is National Small Series Type Approval.

For definitions of "incomplete", "complete" and "completed" please refer to the IVA Information Guide on the websites (see 2c).

4e. Has the vehicle been modified since being previously approved?

Any alterations in the structure or fixed equipment of the vehicle which affect its carrying capacity and

alterations to any part of a braking system or its means of operation must be stated. Modifications to any system previously approved must also be indicated in this section.

4f. This item relates to compliance with the requirements of EMC (Electro Magnetic Compatibility). Please advise us of any electronic equipment that has been fitted to the vehicle, following the issue of an approval to the base vehicle.

If equipment is fitted it is required to meet Directive requirements as demonstrated by a manufacturer's approval marking, if it is in operation when the trailer is travelling on the road.

4g. Has the vehicle had a 'One-Off' Test?

A 'One-Off' test is a test on an individual vehicle where the information provided will include documentation from a Technical Service that will not be used for any other vehicle applications.

4i. Is the vehicle to be assessed against an existing Model Report?

A Model Report is a document created as a result of a vehicle being submitted to a Technical Service (a designated Test Laboratory) and being fully documented such that the report can be used to establish compliance on future vehicles of the same specification. You may be able to obtain the use of an existing Model Report, some of which are listed on our website.

If presenting a vehicle using a Model Report, you should be prepared to remove or dismantle trim and other parts so that the examiner can gain access to critical parts.

If you want your vehicle to be tested against an existing Model Report, we may choose to carry out a 'compliance check'. This is a check we carry out on a sample of vehicles to make sure that;

- they are built to the same specification as the original vehicle described in the Model Report (the original vehicle having been tested and found to meet the relevant technical requirements); and
- they actually meet the technical requirements and are built to the specification described in the Model Report.

The compliance check is part of the 'approval' process. If we decide to carry out the check on your vehicle, we will tell you when you bring the vehicle for the test. You will have to leave the vehicle at the test station. We will then transport it to an Independent Technical Service, who will carry out a full check of the vehicle against the relevant Model Report. You may claim a refund of the cost of your return journey to your home or place of work. We will not charge for transporting the vehicle to or from the laboratory or for the compliance check. The process is likely to take around two weeks. We will tell you when the check has been completed, when the vehicle will be returned to the test station and the result of the check.

The result of this compliance check can affect the future use of the Model Report in question.

SECTION C - PLATING

5. BRAKES, TYRES AND SUSPENSION

5a. What type of brake system is fitted?

This relates to the basic mode of operation of the braking system. Where a brake system is primarily operated by air, although incorporating an electronic control system e.g. ABS or EBS, the system is considered to be a "Full Air" system.

An "electric" brake system is one where the foundation brake is operated solely by electrical energy.

5d. Is a transmission parking brake fitted?

This question relates to a parking brake that operates on the gearbox or propshaft of the vehicle. Do not include engine braking devices.

5e. Which tyre use condition applies? (2B, 2J, 2R etc.)

The tyre use conditions provide for the use of tyres of a lesser capability under specified conditions.

TYRE CODE	CONDITION
2B	No special condition.
2J	The use on roads of the motor vehicle is limited to use by a local authority, or a person acting in pursuance of a contract with local authority, for road cleansing, road watering or the collection or disposal of refuse; night soil or the contents of cesspools, or for the purposes of the enactments relating to weights and measures or the sale of food and drugs and at speeds not in excess of 40mph and <u>only</u> within a radius of 25 miles from the permanent base from which it is normally used.
2R	The use on roads of the vehicle is limited at all times to speeds not in excess of 50mph and subject to the requirement to display at the rear a "50" plate in accordance with the Road Vehicles (Construction and Use) Regulations 1986, Schedule 13.

5f. Tyre/suspension fitment details

Please specify the tyre size and type. The size and type can be obtained from the manufacturer's side wall markings e.g. 8.5R 17.5, or 10R 22.5, the type being "Radial" or "Crossply".

The "load index" and "speed rating" are also displayed on the tyre side wall markings, a typical marking being e.g. "156/150L". "156/150" being the code that is used to establish the tyre's carrying capacity and the speed rating (e.g. "L") being the code indicating the speed up to which the tyre can carry the designated weight.

"Twin or Single" indicates whether the tyres are fitted in twin or single formation i.e. two on each side of the axle or one on each side of the axle.

6. DIMENSIONS

6a. Overall Length – The maximum length of the vehicle excluding;

- ◆ Wiper and washer devices
- ◆ Front or rear registration plates
- ◆ Lighting equipment
- ◆ Mirrors and other devices for indirect vision
- ◆ Access steps and hand-holds
- ◆ Lifting platforms, access ramps and similar equipment in *running order* (i.e. in the position they would be on a moving vehicle), not exceeding 300mm, provided that the loading capacity of the vehicle is not increased.
- ◆ Coupling devices
- ◆ Trolley booms of electrically-propelled vehicles
- ◆ External sun visors.

Overall Width – The maximum width of the vehicle at its widest point excluding;

- ◆ Tyre-pressure or tyre failure indicators
- ◆ Protruding flexible parts of wheelguards
- ◆ Lighting equipment
- ◆ Mirrors and other devices for indirect vision
- ◆ Access ramps in *running order* (i.e. in the position they would be on a moving vehicle), provided that they do not exceed 10mm from the side of the vehicle and the requirements of section 16 (Exterior Projections) are met
- ◆ Retractable steps
- ◆ The deflected part of the tyre walls immediately above the point of contact with the ground
- ◆ Handles and hinges of external lockers
- ◆ Trim protruding not more than 10mm from the bodywork.

ANNEX A

This application is required to be supported by evidence of compliance with certain EC Directives. Where this evidence is not available from the vehicle manufacturer, you will be responsible for providing the required information. Some of the options available to achieve this are listed in the "Vehicle Compliance" section of these notes.

Item 3A – Fuel Tank

Evidence of Directive Compliance is required only for the main fuel tank(s) i.e. those storing fuel for the purpose of engine propulsion.

Item 3B – Rear Under-run

As an alternative to providing Directive Compliance, evidence can be demonstrated by submitting calculations that confirm the equipment and its securing arrangements comply with the Directive strength requirements.

Item 36 – Heating Systems

Evidence of Directive compliance is required **only** if the vehicle is fitted with a Combustion Heater.

VOSA TEST LOCATIONS	
AVONMOUTH	Merebank Road, Avonmouth, BS11 8AQ
GLASGOW (BISHOPBRIGGS)	Crosshill Road, Bishopbriggs, Glasgow, G64 2QA
GILLINGHAM	Ambley Road, Gillingham, Kent, ME8 0SJ
NORTH MANCHESTER (CHADDERTON)	Broad Gate, Broadway Business Park, Chadderton, Oldham, OL9 9XA
DERBY	Curzon Lane, Alvaston, Derby, DE24 8XB

The above VOSA Test Stations cannot be contacted directly. Please telephone our Contact Centre on **0300 123 9000** if you wish to be transferred through to your chosen Test Station for a specific enquiry.
